

# WINDSTREAM VOICEMAIL

Windstream offers a simple, cost-effective messaging solution so your callers can leave a voice message when the telephone line is busy or cannot be answered.

With customized greetings and passwords, plus the ability to store messages, VoiceMail gives business customers a powerful alternative to expensive internal voice mail systems. Windstream allows you to check your voicemail from any location – which means you stay in touch.

## FEATURES:

- + Create individual user greetings and passcodes for all users
- + Distribute guest passwords for private messaging between users and important guests
- + Store important messages for quick and easy access
- + Receive notification of new messages from your BlackBerry®, cell phone or a pre-designated number
- + Time your message's delivery with "private", "urgent", "confirm delivery" and "future delivery" options
- + Send, receive or reply to a copy of any message to another user
- + Retrieve messages from a remote location using a simple call-in number and your passcode
- + Keep employees current with group mailbox options

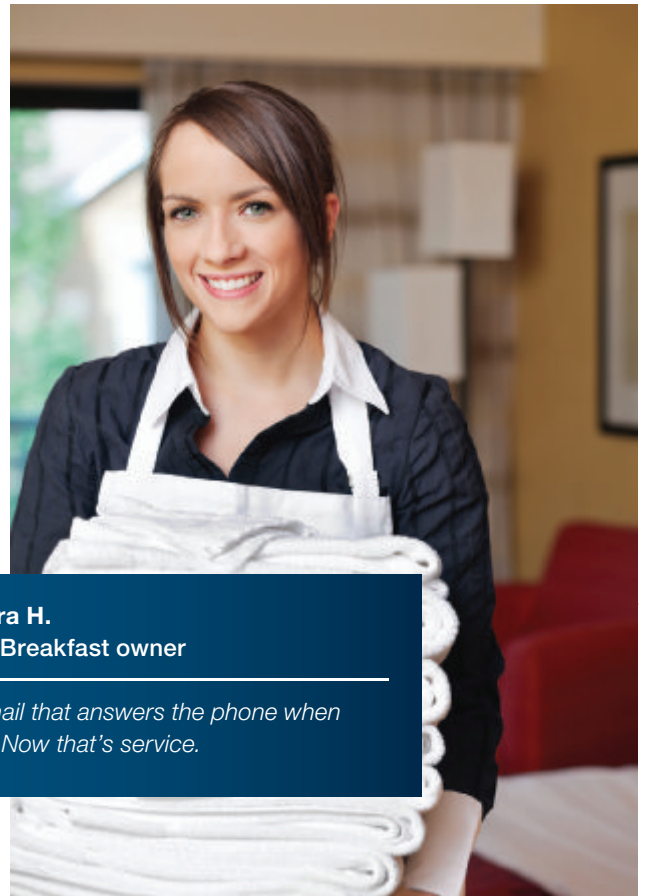

## ADVANTAGES:

**Always Available:** Subscribers enjoy the convenience of retrieving messages 24/7 from any touch-tone phone.

**Private:** A required personal passcode to retrieve messages protects the privacy of your business and incoming calls.

**Effective:** Improve productivity by having VoiceMail take calls when you are busy, on the phone or away from the office.

**Reliable:** With VoiceMail, you can be sure that messages are received in an accurate and timely manner.
