

MPLS VPN Networking Solution

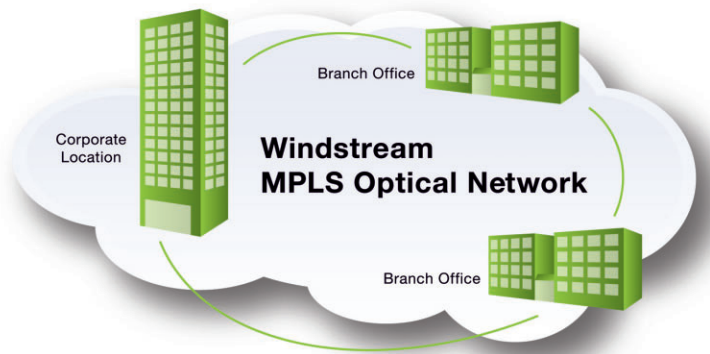

Windstream's MPLS VPN Networking provides managed solutions that extend communications across multiple business locations.

This product enables users to prioritize voice or data through quality of service (QoS) levels, based on their unique business requirements. MPLS Networking Solution is a private, secure network solution built across the Windstream core MPLS (Multi Protocol Label Switching) advanced IP network. You can enjoy the benefits of MPLS while Windstream manages everything for you.

How does implementing a MPLS VPN solution benefit your business?

- **Customized Solution:** The Windstream team can customize a solution tailored to your specific business needs
- **Operational Cost Savings:** Reduce network management expenses by outsourcing to Windstream
- **Scalability:** Easy to add new sites and change bandwidth, makes budgeting for network growth simpler
- **Enhanced Reliability:** Windstream's MPLS carrier-grade network is private and secure—offering you improved network resiliency
- **Minimal Implementation Disruption:** Solution enables you to retain your current private IP addressing plan
- **Reduced Risk:** Windstream assumes responsibility for technology management and evolution
- **100% US-based Technical Support Available 24/7/365:** Highly-skilled Engineers located in redundant geographical locations are always available to provide support and trouble resolution

Quality of Service options to meet your business needs

- **Real Time QoS:** This preferred voice networking solution delivers premium QoS to your site allowing you to maintain your own VoIP network.
- **Business Critical QoS:** This preferred data networking solution provides priority treatment to data networking packets over Internet traffic. Ideal for video conferencing solutions.
- **Best Effort QoS:** A best effort data networking solution, enabling customers to share data and Internet applications across all locations.

How QoS Works

Imagine rush hour traffic at 5pm on Friday in a large city...

- Every lane is bumper to bumper with traffic
- As you are traveling, you look to your left and the HOV lane is flowing smoothly
- Just imagine if you met the requirement to be in the HOV lane
- You'd be at home relaxing in no time...

Real Time VOIP

Real Time always meets the requirements to enter the HOV lane

 **Real Time**

 **Business Critical**

 **Best-Effort Data**
