

WINDSTREAM HOSTED SOLUTIONS COLOCATION

As your business grows, so will the amount of data you collect to fully serve your customers. The data you need to maintain your critical business and compliance functions could over-load storage solutions of the past. The larger you grow, the more resources you will need to ensure the availability, security, reliability and redundancy of your critical data.

Complete Security and Service in Multiple Sizes

Windstream Colocation can provide SAS 70 Type II compliant facilities. Let our Data Center experts relieve your business from the stress of managing a data center. Our 24/7/365 security and controlled environment provides complete protection of your data. Choose just the space you need: one-half, full locking cabinets and cages available.

Reliability

We utilize internet connectivity via multiple fiber routes in and out of our colocation, as well as diverse paths to the Internet. We maintain a state of the art core network. We also ensure complete physical security with restricted access and a continuously monitored surveillance system.

To learn more about how your business can benefit from Colocation, contact your Windstream Representative.

WINDSTREAM**BUSINESS**.com/hosted
