

DCS Fact Sheet

Your voice and data connections start with DCS Service

DCS Services offers Digital Trunks that connect a PBX, or Key System to the Windstream Central Office, providing access to the Public Switched Telephone Network (PSTN). This solution is ideal for businesses of any size that are looking for a reliable, cost-effective voice solution.

Benefits for your business:

- An easy simple-to-buy, robust product with up to 24 channels you can use to transmit your voice or data services.
- Ability to carry inbound, outbound or two-way traffic, reducing the total number of connections you need.
- Competitive pricing.

Features:

- Analog or Digital connections.
- Provided via T-1 facility with up to 24 channels to transmit voice or data.
- Each of the 24 channels can be configured to best fit your business requirements.
- Supports Inbound, Outbound and Two-way traffic.
- Direct Inward Dial (DID) support.
